

Billing performance

All businesses | 2026-01-01 to 2026-09-26

Amounts in USD | As of 2026-09-26 | Recorded through 2026-09-27T06:51:35.115Z

Work entered standard value	45
Actual work hours	0.6
Unbilled WIP at cutoff	22.5
Held work standard value	0
Gross issued charges	22.5
Prebill concessions already deducted	0
Credit memos net of reversals	3
Voided charge components	0
Net billed by effective date	19.5
Applied receipts net of reversals	15
Gross cash received	1315
Cash receipt reversals	0
Cash returned	0
Held receipt credit at cutoff	0
Statement credit at cutoff	0
Bad debt write-offs	10.75
Noncash applications	5
Retainer applications	0
Issued cohort net billed at cutoff	19.5
Same cohort standard value	22.5
Same cohort applied receipts	15
Same cohort write-offs	2
Billing realization %	86.67
Collection realization %	85.71
Cohort labor cost	7.5
Cohort margin	12
Cohort margin %	61.54
Cost basis	recorded
Estimated cost records	0
Unknown cost records	0
Estimated labor amount	0
Standard value with unknown cost	0
Recurring fees	0
Fixed charges	0

By business

TEST FIXTURE ACCOUNT		
Work entered standard value		45
Net billed by effective date		19.5
Applied receipts net of reversals		15
Cohort margin		12
Cost basis	recorded	
Unattributed legacy work standard value		0

Definitions and limits

WORK_ENTERED

Actual hours and standard value by service date; excludes copied tracker rows. Held tracker work is separate.

WIP

Eligible billable work not yet on an issued statement at As of. Held/unresolved work is separate.

BILLED

New charges on issued statements by statement issue date, less prebill concessions and effective credit memos/voids. Balance forward, drafts and applications are excluded.

COLLECTED

Receipt-backed applications by effective date, net of reversals. Cash deposits, noncash adjustments and credit transfers are separate.

COHORT

Statements issued in the selected period, with corrections and applications through As of. Billing realization uses the same work; collection realization uses collectible cohort net charges after bad-debt write-offs.

MARGIN

Cohort net billed less actual-hours labor at captured rates. Unknown costs suppress margin; historical rate/quantity estimates are labeled. A staff rate change affects future records only.

ATTRIBUTION

Work filters use worked for; revenue/cash filters use billed by. Historical tracker attribution never moves ledger balances. Unresolved legacy work is explicitly unattributed.

RECURRING

Covered effort is assigned to its client/business service period. Fee attribution is proportional to the standard value of supporting work; fee and covered standard value are never both denominators.

KNOWLEDGE

Recorded through is a UTC knowledge boundary. Pre-audit changes cannot be reconstructed; legacy evidence is explicitly estimated.

The matching CSV includes every issued cohort, worked-for / billed-by allocation and work cost provenance. Unknown costs are not treated as reliable zero.
